

Final Executive Report

NovaTech SaaS Analytics Transformation Project

Executive Summary

NovaTech engaged a Data & AI Consultant to evaluate revenue growth, customer retention, support operations, and marketing effectiveness using Excel, MySQL, and Tableau.

Key KPIs

Revenue: \$826,605.26; Transactions: 3,215; Active Customers: 336; Churn Rate: 16%; Tickets: 900; Average Resolution Time: 37.4 Hours; Leads: 18,488; Cost per Lead: \$29.49.

Revenue Findings

Revenue exceeded \$826K and was diversified across industries and countries. Finance emerged as a leading revenue contributor.

Customer & Churn Findings

84% of customers remained active. Churn was concentrated in specific segments and markets, supporting targeted retention strategies.

Operations Findings

65% of tickets were low severity. Support activity was similar between active and churned customers, suggesting support was not the primary churn driver.

Marketing Findings

Google generated the most efficient results with the lowest cost per lead, while LinkedIn had the highest acquisition cost.

Recommendations

Reduce churn in high-risk segments, improve retention programs, optimize marketing allocation, and strengthen high-severity ticket handling.
